LENGGONG

LENGGONG | PERAK | MALAYSIA

Lenggong is situated in the Lenggong Valley, sandwiched between the Bintang and Titiwangsa Ranges. It is a rural area, with small kampongs surrounded by green vegetation and limestone hills with numerous caves. The Lenggong Valley is one of Peninsular Malaysia's most important areas for archaeology, as excavations have revealed many traces of Malaysia's prehistory, with finds such as cave drawings, jewellery, pottery, weapons and stone tools. It is the site of one of the oldest known place of human activity in the Peninsula. The Lenggong Valley was listed by UNESCO as a World Heritage Site on 30 June 2012.

Lenggong is accessible by trunk roads connecting it with neighbouring towns and cities. The town of Lenggong is situated some 100 kilometres north of Ipoh on the Kuala Kangsar to Grik road (highway 76). The road to Lenggong is surrounded mostly by oil palm estates and jungles. As cows and buffalo are part of the agriculture, they are often seen along the road. The jungles (about million years old) are now in danger of heavy illegal logging.

To visit Lenggong, from the North–South Expressway take Exit No.143 at Kuala Kangsar – that's about 3 hours away from Kuala Lumpur. Then take Route 76 to Lenggong. The new highway is open and has replaced the old scenic kampung road.

Gua Gunung Runtuh is situated in Bukit Kepala Gajah or Elephant's Head Hill. In the same hill other caves have yielded archaeological remains such as stone tools and food remnants. The caves were probably used as temporary shelters as seasonal or hunting camps, whereas Gua Gunung Runtuh was lived in for longer periods. Gua Harimau, or Tiger Cave, is a site about 3 kilometres away from Gua Gunung Runtuh which was probably used as a burial ground about 3,000 – 5,000 years ago as seven human skeletons have been found at the site along with bronze axes and various articles of jewellery. The bronze axes show that there was an early Bronze tradition in Malaysia, as well as in north Thailand and China. It is the earliest use of metal in south-east Asia. Porcelain containers of various shapes and sizes were also found containing meat and snail shells. Archaeological digs in other caves have revealed pottery, axes stone tools and flakes. Food also remains, and in some sites, human bones. Unfortunately, some caves have been disturbed by guano diggers and any remains have been lost

LENGGONG NATIONAL GEOPARK (UNESCO WORLD HERITAGE SITE)

The oldest human skeleton found in Malaysia was at Gua Gunung Runtuh in the state of Perak in Peninsular Malaysia. The cave was his final resting place situated in Bukit Kepala Gajah or Elephant's Head Hill in the Lenggong Valley of Ulu Perak. The skeleton was a male with a height of approximately 157 cm, estimated to have been in his 50s. The skeleton was discovered in 1991 and has been dated to around 11,000 years old. It is one of the most complete skeletons for this time period in this region

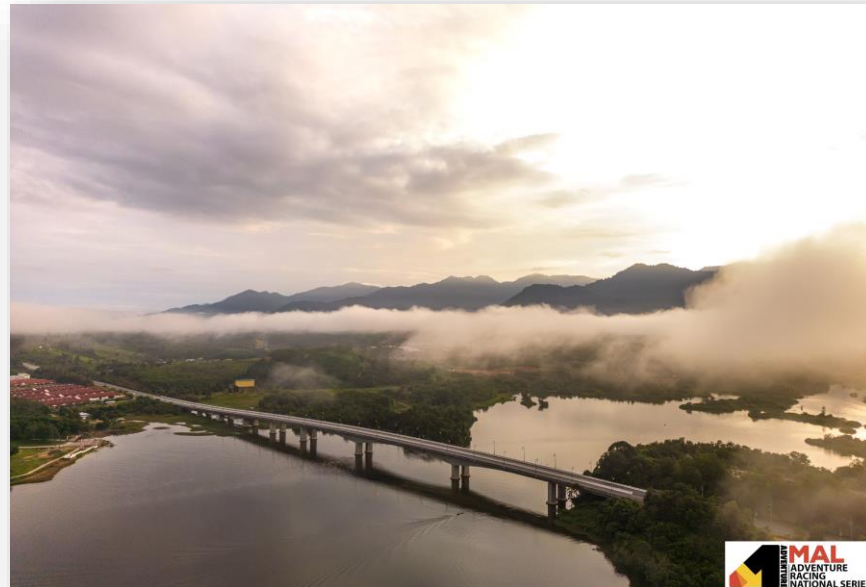

He was buried in the fetal position, with deposits of animal bones at his right shoulder, to his left and to his bottom, and deposits of stone tools around the body. There were no other burials in the cave. The Perak Man had a malformed left hand, his left arm and hand were much smaller compared to his right arm and hand. This deformity could be from a genetic disorder known as brachymesopthalangia. This evidence is further supported by the fact that his spine is curved towards the right due to living with only one good hand.

The bones that were found deposited near him were identified to have come from wild boar, monkey, monitor lizard and deer and are thought to have been food deposits. There were about ten stone tools scattered around the body, and most of them were pebble tools and some hammer stones

One conclusion that the study made was that he must have been an important member of society because his burial was very elaborate and labour intensive. The Perak Man was put into the pit with food offerings, covered with small shells, then more offerings and tools, and then another shell layer, followed by a final dirt layer. Furthermore, he was estimated to have been in his 50s which was very old for a person from that era with a disability. People had to take care of him – and people would not take it upon themselves unless he was respected or highly ranked in some sort of social hierarchy.

MALAYSIA IRON BOUND SERIES RECOGNITION

Attn: Atty. Shamsuri Abd Latif
Persatuan Sukan Orienteering Malaysia
Akademi Orienteering Malaysia
No 14, Jalan Indah 2, Taman Desa Indah
34200 Parit Buntar, Perak
MALAYSIA

Re: 2022 Adventure 1 Series Malaysia

Dear President, Dear Mr. Latif,

It is with great pleasure that we approve Malaysia Ironbound Lenggong and Malaysia Ironbound Selangor as the 2022 A1 Series Malaysia.

This letter confirms the approval of Akademi Orienteering Global Resources and Magnet Edge Orienteering Sport Club as the producer of the 2022 A1 Series Malaysia.

As an A1 Series producer, you are bound by the World Obstacle Code of Ethics and must return a signed copy of the Code of Conduct.

Adventure 1 and World Obstacle will endeavor to provide all support necessary to ensure the success and growth of A1 Series Malaysia. We will introduce and encourage collaboration with the Malaysian Obstacle Sports Association, the national federation member of World Obstacle.

Please don't hesitate to contact us if you have questions or need further assistance.

With best regards,

Ian Adamson
President
World Obstacle

Re: World Obstacle Recognition

Dear President, Dear Mr. Abd Latif,

World Obstacle, the Fédération Internationale de Sports d'Obstacles (FISO) is pleased to recognize Magnet Edge Orienteering Sport Club (MEOSC) as the sole national governing body for Adventure Racing in Malaysia.

As a national governing body recognized by FISO, MEOSC is also recognized by Obstacle Sports Federation Southeast Asia and Obstacle Sports Federation Asia Pacific, the regional continental confederations of FISO members, with full rights of all organizations.

Recognition may be suspended or revoked if MEOSC does not maintain compliance with the FISO Code of Ethics, Statutes and Bylaws.

Please contact our office if you have questions.

Kind regards,

Ian Adamson
President

Re: Expedition Racing World Cup Malaysia 2024

August 13, 2024

Dear Mr. Shamsuri Abd Latif,

World Obstacle, the Fédération Internationale de Sports d'Obstacles (FISO), is delighted to approve Malaysia Ironbound Adventure Race the 2024 Expedition Racing World Cup Asia.

FISO is the world governing body and sole competent authority for Obstacle Sports, including Adventure Racing, Obstacle Course Racing and Ninja Competitions. Obstacle Sports are practiced by 30 million athletes in watched by 1 billion people in 160 countries.

World Obstacle produces events in the Southeast Asia Games (recognized by the IOC) and collaborates with World Pentathlon (UIPM) to produce events for Olympic programming in the Summer Games.

Please let me know if you need further information and how we can be of assistance.

Yours Sincerely,

Ian Adamson
President
